

Medical Insurance Confirmation Automation

Integrated Employee Confirmation & Insurance Enrolment Workflow

To streamline employee confirmation tracking and medical insurance enrolment, an automated workflow has been developed using **Microsoft Lists** and **Power Automate**. The solution eliminates manual follow-ups, automates supervisor notifications, captures approval decisions, records audit information, and supports future confirmation extensions through a controlled approval mechanism. The automation has been designed to operate as part of a larger employee lifecycle framework, integrating with the existing **30-Day** and **90-Day Check-In** processes.

1. Current Process Challenges

The existing process relies heavily on manual monitoring and follow-ups:

- HR manually tracks employee confirmation eligibility.
- Supervisors are contacted through individual emails.
- Follow-ups are required to obtain responses.
- Confirmation extensions are difficult to track consistently.
- Auditability of decisions is limited.
- Insurance enrollment decisions may be delayed due to missed communication.

These challenges increase administrative effort and create a risk of delayed insurance activation.

2. Proposed Automated Solution

The automation monitors employee probation progress and initiates an approval workflow whenever an employee is approaching confirmation.

Monthly Automated Trigger

The flow executes automatically on the **1st day of every month**.

During each run, the system:

1. Retrieves employees requiring review.

2. Evaluates confirmation eligibility.
3. Identifies the appropriate approver(s).
4. Sends automated approval requests.
5. Captures responses and updates the tracking list.

3. Confirmation Date Determination Logic

The solution supports both system-calculated and manually revised confirmation dates.

Standard Confirmation Date

The system calculates:

Expected Confirmation Date = Date of Joining + 180 Days

This date serves as the default expected confirmation date for all employees.

Revised Confirmation Date

In cases where confirmation is extended, HR may manually update:

Revised Confirmation Date

The automation then follows the logic below:

If Revised Confirmation Date exists
Use Revised Confirmation Date

Else

Use Expected Confirmation Date

This ensures future approval requests are aligned with the latest business decision while retaining the original probation calculation for historical reference.

4. Approval Workflow

Department-Based Approver Mapping

A centralized Department Email Mapping List maintains:

- Department
- Approver Email IDs

Based on the employee's department, the automation identifies the relevant supervisor(s) and routes the approval request accordingly.

Multiple Approver Support

The solution supports multiple approvers for a department.

Example:

approver1@company.com;
approver2@company.com;
approver3@company.com

Approval Type:

Approve / Reject – First to Respond

All approvers receive the request, while the **first response determines the outcome**.

Supervisor Notification

The supervisor receives an automated approval notification containing:

- Employee Name
- Date of Joining
- Effective Confirmation Date
- Approval Instructions

Decision options:

Approve → Include in Insurance
Reject → Defer Insurance Enrolment

5. Decision Handling

Approve Scenario

When a supervisor approves:

- Insurance Decision = Include
- Decision Status = Completed
- Approver Name is captured
- Response Date is captured
- Previous rejection comments are automatically cleared

Result:

Employee becomes eligible for insurance enrolment.

Defer Scenario

When a supervisor defers:

- Insurance Decision = Defer
- Decision Status = Pending
- Supervisor comments are captured
- Approver Name is captured
- Response Date is captured

The employee remains under review until a revised confirmation date is provided or a future approval cycle is completed.

6. Extension & Re-Approval Process

The solution supports multiple confirmation extensions.

Example

Initial:

Expected Confirmation Date = 11-Jul-2026

Supervisor Response:

Defer

Comment: Confirmation extended by 2 months

HR Update:

Revised Confirmation Date = 11-Sep-2026

During subsequent monthly executions:

- July cycle → No further action
- August cycle → Approval request automatically generated for September confirmation

This allows the process to continue without manual intervention while maintaining a complete audit history.

7. Audit & Reporting

The Medical Insurance Tracking List maintains:

Field	Purpose
Employee Name	Employee Details
Date of Joining	Joining Date
Expected Confirmation Date	System Calculated Date
Revised Confirmation Date	HR Override Date
Insurance Decision	Include / Defer
Decision Status	Pending / Completed
Decision By	Supervisor Who Responded
Response Date	Approval Timestamp
Remarks	Supervisor Comments

This provides HR with a complete audit trail and real-time visibility into all confirmation and insurance decisions

8. Integrated Employee Lifecycle Automation

This solution is not intended to operate as a standalone process.

The Medical Insurance Confirmation workflow is integrated with the broader employee lifecycle monitoring framework:

The same employee master list and department email mapping structure are reused across all stages, eliminating the need to maintain separate automation solutions.

9. Key Benefits

Operational Benefits

- Eliminates manual tracking and follow-ups.
- Reduces administrative effort.
- Ensures timely confirmation reviews.
- Improves response turnaround time.
- Supports automated re-notification for deferred cases.

Governance Benefits

- Complete audit trail.
- Captures approver name and response date.
- Maintains supervisor comments.
- Supports historical tracking and compliance reviews.

Business Benefits

- Timely medical insurance enrolment.
- Improved stakeholder visibility.
- Standardized probation management process.
- Unified employee lifecycle management across 30-Day, 90-Day, and Confirmation checkpoints.

Conclusion

The proposed solution provides an end-to-end automated framework for employee confirmation and medical insurance enrolment. By integrating probation monitoring, supervisor approvals, confirmation extensions, and insurance decision tracking into a single platform, the organization gains a scalable, auditable, and efficient process with minimal manual intervention while maintaining complete visibility for HR and business stakeholders.

Medical Insurance Confirmation – charles karlz

Dear Supervisor,

As per the employee's Date of Joining 12-01-2026, charles karlz is due for confirmation on 11-07-2026

To ensure smooth activation of medical insurance upon confirmation, we require the employee's confirmation details in advance.

We request you to kindly confirm whether the employee will be confirmed on the above-mentioned date or if there will be an extension. In case of an extension, please share the revised expected date of confirmation.

We request you to provide your response within 5 working days to avoid any delays in processing.

Thank you
HR Team
